INPOST PARCEL LOCKERS 24/7

FOR OSCOMMERCE

osCommerce version: 2.3.3

Plugin enables osCommerce store integration
with InPost Parcel Lockers 24/7.

BEFORE YOU START
plugin installation

- Make the backup copies for the store, files, and databases, for safety reasons.

- Copy all files and directories of the plugin to the project. The structure of the files and directories plugin reflects the structure of directories in osCommerce.

- **Important information!** 6 files of original osCommerce plugin have been changed. You can rewrite them in your project or fill in the changes that are shown here:

  ```
  // start parcellocker24
  // change...
  // end parcellocker24
  ```

| checkout_confirmation.php | *lines 67-79 added* |

checkout_process.php	*lines 262-283, 309-314 added*
checkout_shipping.php	*lines 131-136, 286-290 added*
admin/includes/boxes/customers.php	*lines 26-32 added*
admin/includes/database_tables.php	*lines 63-65 added*
includes/database_tables.php	*lines 62-64 added*

- Activate the plugin using the button *INSTALL MODULE* in *MODULES/SHIPPING* tab. Just click the button and then choose the module InPost Parcel Lockers 24/7, then press the button again.
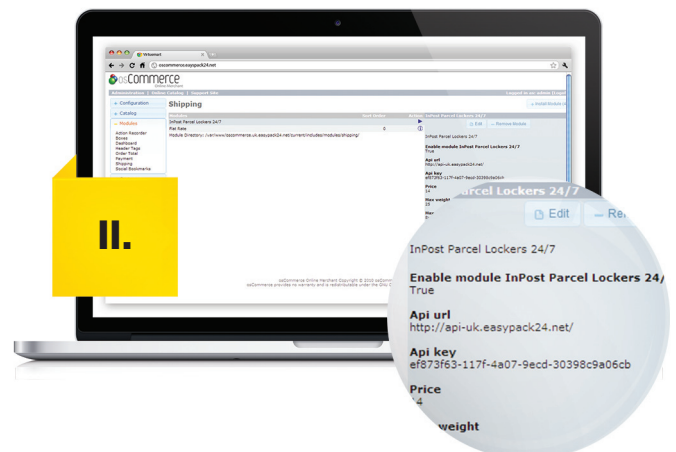

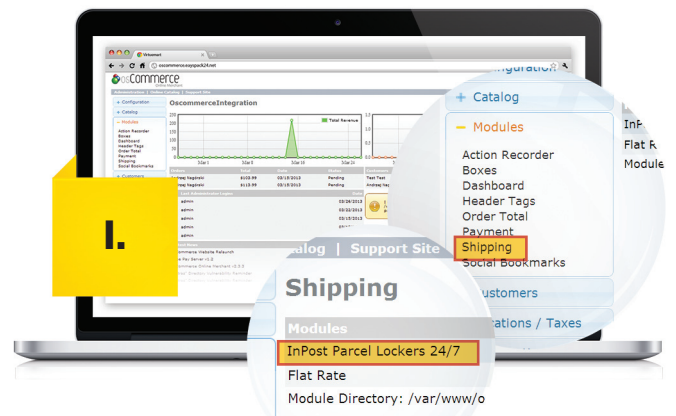

LET'S GET STARTED!

I. Plugin configuration

- Log into the admin panel of osCommerce.

- Go to the *MODULES/SHIPPING* tab.

- Choose the *InPost Parcel Lockers 24/7* module.

- Click *EDIT* button. Configuration options for InPost Parcel Lockers will be displayed.

II. Shipping methods

Complete the following data:

- **Api url -** the address of the API (e.g. http://api-uk. parcellocker24.net/), remember to put slash at the end.

- **Api key -** the key to the API.

- **Allowed country** - a country where the API is to be active. Only one country can be entered. UK is default.

- **The Sizes** are defined in the following format: *width* x *height* x *depth*.

- **Weight and size** - remember the weight and sizes are limited by the lockers size, so you cannot enter larger parameters than recommended.
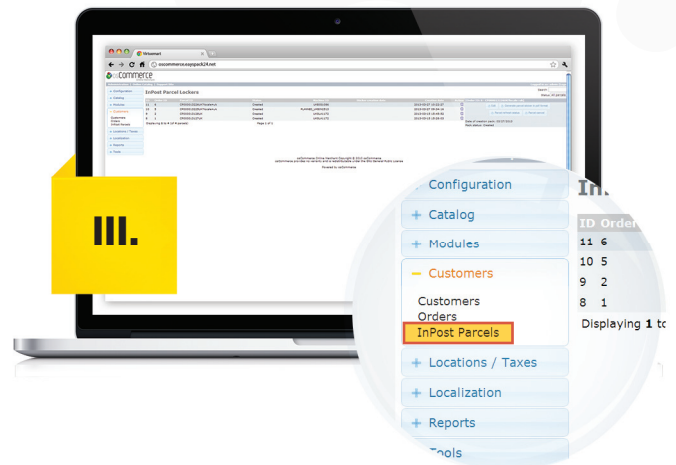

Basic version of the osCommerce does not support the feature of parcel sizes.

III. List of parcels

As e-store administrator, you can view the list of all created parcels.

- The list of parcels is displayed in *CUSTOMERS/INPOST PARCEL* tab.

- Parcel is created automatically after the client submits the order with InPost Parcel Locker delivery option.

- Each parcel can also be edited. This is the "parcel update" functionality equivalent, as described in the API documentation in the sec.1.5.8. Parcel update.

III.

IV. Where your customer can find us?

- **Choosing product**
  If the weight of item does not exceed the values defined in configuration section, customer can see InPost Parcel Locker 24/7 as the option for delivery.

- **Selection of the nearest locker**
  If the city is not on the list, the message "No lockers in your city" should appear, but after pressing the *SHOW LOCKERS IN OTHER CITIES*, the list of parcel machines available in the given country appears. You can also use the special link with maps and locate the nearest InPost Parcel Locker 24/7.

- **Contact data**
  Make sure that email address and mobile phone number of receiver are entered properly. Mobile number must consist of nine digits and "0" cannot be the first digit.

IV.

SHARE YOUR EXPERIENCE WITH US!

1. How do you find manual in general?

2. How convenient is the instruction?
   (where 7=excellent and 1=need lots of improvement!)

3. How likely you are to recommend us to others?
   (where 5=extremely likely and 1=not at all likely)

CAN WE MAKE IT BETTER?
